Innovative Low Pressure MoldingTechnology

# PRODUCT DESCRIPTION

### POLYMELT PA 269 provides the following product characteristics:

Technology	Polyamide
Appearance	Black / Amber
Product Benefits	Easy moldability
	Good adhesion to a variety of substrates
	Excellent moisture resistance
	Excellent environmental resistance
	Simplified process flow
Application	Molding compound thermoplastic
Typical Applications	Encapsulation
Flammability Rating	UL 94 V0
Operating Temperature	-40 to +100 ℃

POLYMELT 269 is a polyamide resin especially designed for hot melt low pressure molding. It is easy to soluble in mixed organic solvent -such as aliphatic or aromatic hydrocarbons and alcohols type solvent. This resin has the characteristics of short setting time good mechanical strength 、 heat resistance, flexibility and good wetting properties at application temperature ,this product is application for bonds to many difficult substrates 、 electrical insulation of parts 、 mechanical protection 、 automotive industry.

#### **Typical Applications**

POLYMELT PA 269 has been formulated to provide the best possible moldability and as wide a molding latitude as possible. Much of the final molding parameters will be determined by the mold design. Although molding and curing conditions will vary from situation to situation, recommended starting ranges are shown above.

#### **Material Properities**

Viscosity @ 200 °C, mPa • s (cP)	2,000 to 4,000
Density, g/cm <sup>3</sup>	0.98
Softening Point, $\ ^{\circ}\mathbb{C}$	170 to 180
Molding Temperature, $^\circ\!\mathrm{C}$	200 to 220
Shore Hardness, Shore A	90
Elongation , at break,%	>400
Tensile strength , Mpa	>10
Dielectric Strength, kV/mm	19
Transversal Resistivity, ohms-cm	1.3×10 <sup>13</sup>
Moisture absorption,%	0.5
Water content, %	2.8
Processing Moisture Content, %	<0.2
Mold Temperature Ranage, $^{\circ}\!\mathrm{C}$	20 to 60
Drying Time, H	about 2
(Air oven, thin layer)	1 to 8
Drying Temperature, $\ ^{\circ}\mathrm{C}$	70
Shrinkage. %	1.0 to 1.5

# **POLYMELT PA 269**

(Electronics) May-2019

#### **Operating Characteristics**

This product doesn't produce the excitant material when it is a solid. After melting into high temperature glue, it can lead to severe burns, Before using the security measures including protective gloves and goggles. ( More details, please refer to MSDS of this product.)

#### **Directions For Use**

Pouring the product into injection machines, melting under the conditions of 180 $\sim$ 200°C, put some pressure on injection for the cooling and molding.

# Not for product specifications

The technical data contained herein are intended as reference only. Please contact your local quality department for assistance and recommendations on specifications for this product.

## Notice

Keep out of reach of children.

In case of contact with skin, rinse with clean water firstly, don't wipe the skin and call a physical attention immediately.

More details, please refer to MSDS of this product.

#### Package

20kg/bag.

# Storage

Store product in the unopened container in a dry location. Storage information may be indicated on the product container labeling.

POLYMELT PA 269 will absorb moisture from the air. Material from opened containers should be transferred immediately into air tight containers. Material should be stored in sealed containers in a cool dry location in order to maximize shelf life.

Material removed from containers may be contaminated during use. Do not return product to the original container. Nord New Material cannot assume responsibility for product which has been contaminated or stored under conditions other than those previously indicated. If additional information is required, please contact your local Technical Service Center or Customer Service Representative.

Shelf life: 24 months.
